PROJECTS

MINI PROJECT

TITLE: "IMPLEMENTATION OF AES(ADVANCED ENCRYPTION STANDARD) ALGORITHM

Description: The Advanced Encryption Standard (AES), also known as Rijndael, is a specification for the encryption of electronic data. AES takes the plain text of 128 bits as input to encryption block in which encryption of data is made and cipher text of 128 bits is generated as output.

Language of Implementation: C.

MAJOR PROJECT

TITLE: “DOCTOR-PATIENT PORTAL”

Description: In this, patients book doctor appointment and view medical progress. The system allows doctors to manage their booking slots online. The system manages the appointment data for multiple doctors for various date and times. Next time a user logs in he may view his/her entire medical history as and when needed. At the same time, a doctor may view patients medical history even before the patient visits him. This allows for an automated patient doctor handling system through an online interface.

Technologies used: HTML, Servlets, SQL.
